

Ascenz strengthens its Premium Partnership Program with Addition of Apizee as Premium Partner

23 May 2019 – Ascenz Solutions Pte Ltd has signed an agreement with Apizee for the Premium Partnership Program, and both partners will work together to integrate Apizee Diag into Shipulse.

Apizee Diag is Apizee's WebRTC cloud-based solution that enables users to collaborate with onboard crew real time via a visual assistance platform during vessel inspections, assessments, diagnosis or support processes, and Shipulse is Ascenz's flagship product that provides a smart shipping platform for vessel performance monitoring and analysis for all maritime industry players.

As part of the partnership, Apizee brings its expertise and capabilities in visual assistance solutions for the maritime industry to complement Ascenz's open and modular Shipulse platform. The partnership also aims to identify possible combination of services by both parties provided to the maritime industry.

About Ascenz (www.ascenz.com)

Ascenz is a globally trusted provider of premium, end-to-end solutions for the maritime industry. With more than a decade of experience and an established foothold in Asia, we provide intuitive, agile and forward-looking smart shipping solutions and services tailored for offshore, ocean-going, bunkering and Liquefied Natural Gas (LNG) segments. We spearhead the push for rapid digitalization within the maritime industry.

As part of the GTT Group, an international frontrunner in technological solutions for storage and shipping of liquefied gas, particularly LNG, our solutions are aligned with industry trends. We empower and assist users by streamlining processes, increasing both efficiency and sustainability of processes.

Through its Premium Partnership Program, Ascenz is leading the creation of a global alternative digital ecosystem to accompany maritime players in their data and digital journey.
